## PROFILE

Engineering Leader with 16+ years of experience designing, modernizing, and scaling enterprise-grade software systems. Proven track record of leading cross-functional teams across backend, frontend, QA, and DevOps while actively contributing to architecture and hands-on development. Strong expertise in .NET, SQL Server, PostgreSQL, distributed systems, and SaaS transformation initiatives. Experienced in modernizing legacy monolithic systems into scalable, API-driven platforms hosted on cloud and hybrid infrastructure.

Recognized for balancing business delivery with architectural integrity, production reliability, and continuous technical improvement.

## AREAS OF INTERESTS

- |                                                                                                                                        |                                                                                                                                            |

## WORK EXPERIENCES

### SYSTEM ANALYST & TECHNOLOGICAL LEAD

|                                                                     |                          |
|---------------------------------------------------------------------|--------------------------|
| <b>I-Clique Solutions Limited</b><br>May 2025 – Present (10 months) | Dhaka, Dhaka, Bangladesh |
|---------------------------------------------------------------------|--------------------------|

Leading technical direction for financial enterprise systems with high transaction volumes and complex integration requirements.

### Key Responsibilities

- ❖ Owned architecture and modernization of high-volume financial processing platforms (BOS & FEP), evolving them into scalable, service-oriented SaaS systems.
- ❖ Established API governance, data ownership models, and event-driven + batch reconciliation frameworks across distributed services.
- ❖ Directed production readiness, CI/CD standards, and operational stability for Oracle-based transaction systems handling mission-critical workloads.
- ❖ Led and mentored engineering team while reducing technical debt and automating 95% of reconciliation workflows to significantly improve efficiency and accuracy.

### KEY PROJECTS

#### Merchant Portal – Financial SaaS Platform

**Tech Stack:** Java Spring Boot, MySQL, Redis, REST APIs, Docker, Containerized Microservices

Enterprise-grade merchant management platform enabling secure onboarding, transaction processing, compliance workflows, and financial reporting across multiple merchant tenants.

#### Leadership & Architectural Contributions

- ★ Led system architecture design for scalable, API-driven financial platforms.
- ★ Translated stakeholder and regulatory requirements into modular backend services.

- ★ Designed and governed REST API contracts for integration with external financial systems.
- ★ Introduced microservice-based architecture to support high-volume, concurrent merchant operations.
- ★ Defined data ownership boundaries and service interaction patterns across modules.
- ★ Coordinated infrastructure readiness and secure deployment automation.

#### Production & Scalability Impact:

- Scaled prototype into production-ready SaaS platform.
- Reduced administrative overhead by 30% through workflow automation and centralized dashboards.
- Improved system reliability using Redis-based caching and optimized database queries.
- Ensured secure, high-throughput processing for merchant transactions.

**Focus Areas:** SaaS architecture, distributed systems, API governance, workflow automation, production scalability.

#### Back Office Services (BOS) & Front-End Processes (FEP) – Core Financial Processing System

**Tech Stack:** Java Spring Boot, Oracle DB, Custom ORM Layer, Spring Batch, Event-Driven Processing

Mission-critical financial processing platform integrating backend reconciliation (BOS) with frontend transaction routing (FEP), enabling seamless bank transaction handling via payment switches.

#### Leadership & Architectural Contributions:

- ★ Owned architectural design for high-volume financial transaction orchestration.

- ★ Designed batch-processing pipelines for daily and periodic reconciliation reporting.
- ★ Implemented event-driven validation triggers for real-time transaction processing.
- ★ Defined integration contracts between switch systems, reconciliation engines, and reporting services.
- ★ Optimized custom ORM mappings and database interactions for Oracle-based systems.
- ★ Established governance for data consistency across distributed processing layers.

#### Production & Modernization Impact:

1. Automated 95% of manual reconciliation processes.
2. Reduced transaction processing time from hours to minutes.
3. Decreased switch-routing errors by 40% through validation and monitoring mechanisms.
4. Improved peak-load performance via schema optimization and query tuning.
5. Strengthened auditability and traceability of financial transactions.

**Focus Areas:** Distributed financial systems, batch + event-driven architecture, enterprise database optimization, high-availability processing, operational resilience.

## SOFTWARE DEVELOPMENT LEAD ENGINEER

### Enosis Solutions Ltd.

July 2022 – September 2024 (2 year 5 months)  
Gulshan, Dhaka, Bangladesh

Led enterprise application development and modernization efforts across retail, healthcare, and utility domains.

#### Leadership & Architectural Contributions

- ★ Managed and mentored 10+ engineers across backend and frontend teams.
- ★ Led sprint planning, backlog refinement, and cross-team architectural reviews.
- ★ Contributed to hiring decisions and technical interviews.
- ★ Coordinated with DevOps for release planning, rollback strategies, and production monitoring.
- ★ Directed modernization of legacy systems into Azure-hosted SaaS platforms.
- ★ Conducted POCs for microservices architecture transformation.
- ★ Ensured production stability for cloud-based platforms serving international clients.

### KEY PROJECTS

#### Denticon – Dental Practice Management SaaS

- ★ Led architectural design for scalable microservices and API integrations.
- ★ Optimized SQL Server performance for high-volume billing and scheduling systems.
- ★ Implemented real-time features using SignalR.
- ★ Supported Azure migration initiatives.

#### Storm Manager – Emergency Management Platform

- ★ Designed distributed modules for real-time incident and asset management.
- ★ Collaborated with offshore QA and product teams (Thailand, USA).
- ★ Ensured scalable and resilient production deployments.

#### Retail POS System

- ★ Strengthened enterprise architecture and cross-team technical coordination.

- ★ Improved system reliability and deployment governance.
- ★ Environment: .NET Core, SQL Server, Azure, Docker, Kubernetes, Angular, React, SignalR.

*Hands-on with cloud migrations and real-time features like SignalR enhances scalable, integrated platforms for customer-facing operations.*

## LEAD SOFTWARE ENGINEER, TEAM LEADER

### WellDev Bangladesh Ltd.

August 2020 – June 2022 (1 year 11 months)  
Dhaka, Bangladesh

Led and mentored PHP/Drupal teams across 20+ projects for conglomerates, ensuring agile sprints, CI/CD quality, and client reporting.

*Agile practices and portal customizations facilitate efficient, customizable enterprise interfaces.*

## SENIOR SOFTWARE ENGINEER, TEAM LEAD

### Teknordic

November 2019 – August 2020 (10 months)  
Dhaka, Bangladesh

### Leadership & Architectural Contributions

- ★ Led MVP launch of multi-vendor booking platform.
- ★ Integrated 35+ supplier systems using REST/GraphQL APIs.
- ★ Designed payment and third-party integration modules.

- ★ Coordinated sprint execution across distributed teams.

### Environment

- .NET Web API, Angular, SQL Server.

*API-driven integrations and payment workflows enable robust, multi-vendor ecosystem management.*

## LEAD SOFTWARE ENGINEER

### The Jaxara IT Ltd.

October 2017 – May 2019 (1 year 8 months)  
Niketan, Dhaka, Bangladesh

Led CRM modernization and enterprise workflow automation initiatives.

### Contributions

- ★ Customized and extended Microsoft Dynamics CRM for enterprise sales pipelines.
- ★ Developed C# plugins, automation workflows, and integration services.
- ★ Led migration initiatives from legacy systems into Dynamics 365.
- ★ Mentored 5–7 engineers on secure customization practices.

- ★ Delivered 3 CRM transformation projects improving operational efficiency by 25–40%.

### Achievements

*Delivered 3 CRM projects on time, improving sales efficiency by 25% and reducing manual entry by 40%.*

Environment: C#, SQL Server, REST APIs, Enterprise Integration.

## EARLIER LEADERSHIP ROLES

Held progressive leadership roles at:

- ☐ Binate Solutions Ltd.
- ☐ Code Testing Labs
- ☐ Recursion Technologies Limited
- ☐ Wafi Solutions
- ☐ Dhaka Stock Exchange Ltd.
- ☐ Maersk Line

### Experience includes

- ★ Team leadership
- ★ Enterprise solution delivery
- ★ Government project coordination
- ★ Pre-sales technical consultancy
- ★ Large-scale distributed system support

## TECHNICAL SKILLS

### Backend & Architecture

C#, .NET Core, ASP.NET Web API, Java (Spring Boot), Distributed Systems, Event-Driven Architecture

### Databases

Microsoft SQL Server, PostgreSQL, Oracle, MySQL  
Performance tuning, schema optimization, high-volume transaction systems

### Infrastructure & DevOps

Azure, Docker, Kubernetes, Linux & Windows environments  
CI/CD pipelines, Jenkins, Git-based workflows

### Integration & Distributed Systems

REST APIs, GraphQL, Event-based messaging, Microservices, API contract governance

### Cloud & Production

Azure SaaS hosting, Monitoring, Deployment governance, Performance troubleshooting

## EDUCATION

### Queen's University

---

Masters (Alumni), Software Engineering  
(2008 - 2010)

### Independent University, Bangladesh

---

Honors, Computer Science (2001 - 2006)

## LEADERSHIP HIGHLIGHTS

- ★ 16+ years of enterprise system experience
- ★ 7+ years in technical leadership roles
- ★ Led teams of up to 15 engineers
- ★ Modernized legacy systems into SaaS platforms
- ★ Designed distributed systems with API-driven integration

- ★ Experience working with international clients and cross-cultural teams
- ★ Strong communicator capable of explaining architecture to both executives and engineers
